THE WORLD OF STRONKIE

"Come to Ravenmoor at once. I have found it."

A short letter from your eccentric Uncle Edmund brings you to his lonely manor on a stormy night. Nobody has seen him since. What starts as a mystery in a haunted house soon becomes the journey of a lifetime: a hidden starship called the STARRAVEN, a computer with a very dry sense of humour, a derelict space station, the most wretched hive of scum and villainy this side of Andromeda, ghostly space pirates who fight with insults... and at the end of it all, a planet lost for centuries: **the World of Stronkie**.

But the sinister Commander Vex wants the planet's power for himself, and he will stop at nothing to get it. Who is he? And why does his face look so familiar?
